

A light gray world map is centered in the background. The country of India is highlighted in a solid green color, matching the text color. The title 'Open Access Journals in India' is written in a large, green, serif font across the top half of the map.

Open Access Journals in India

Naina Pandita

NIC, New Delhi, India

naina@nic.in

The presentation..

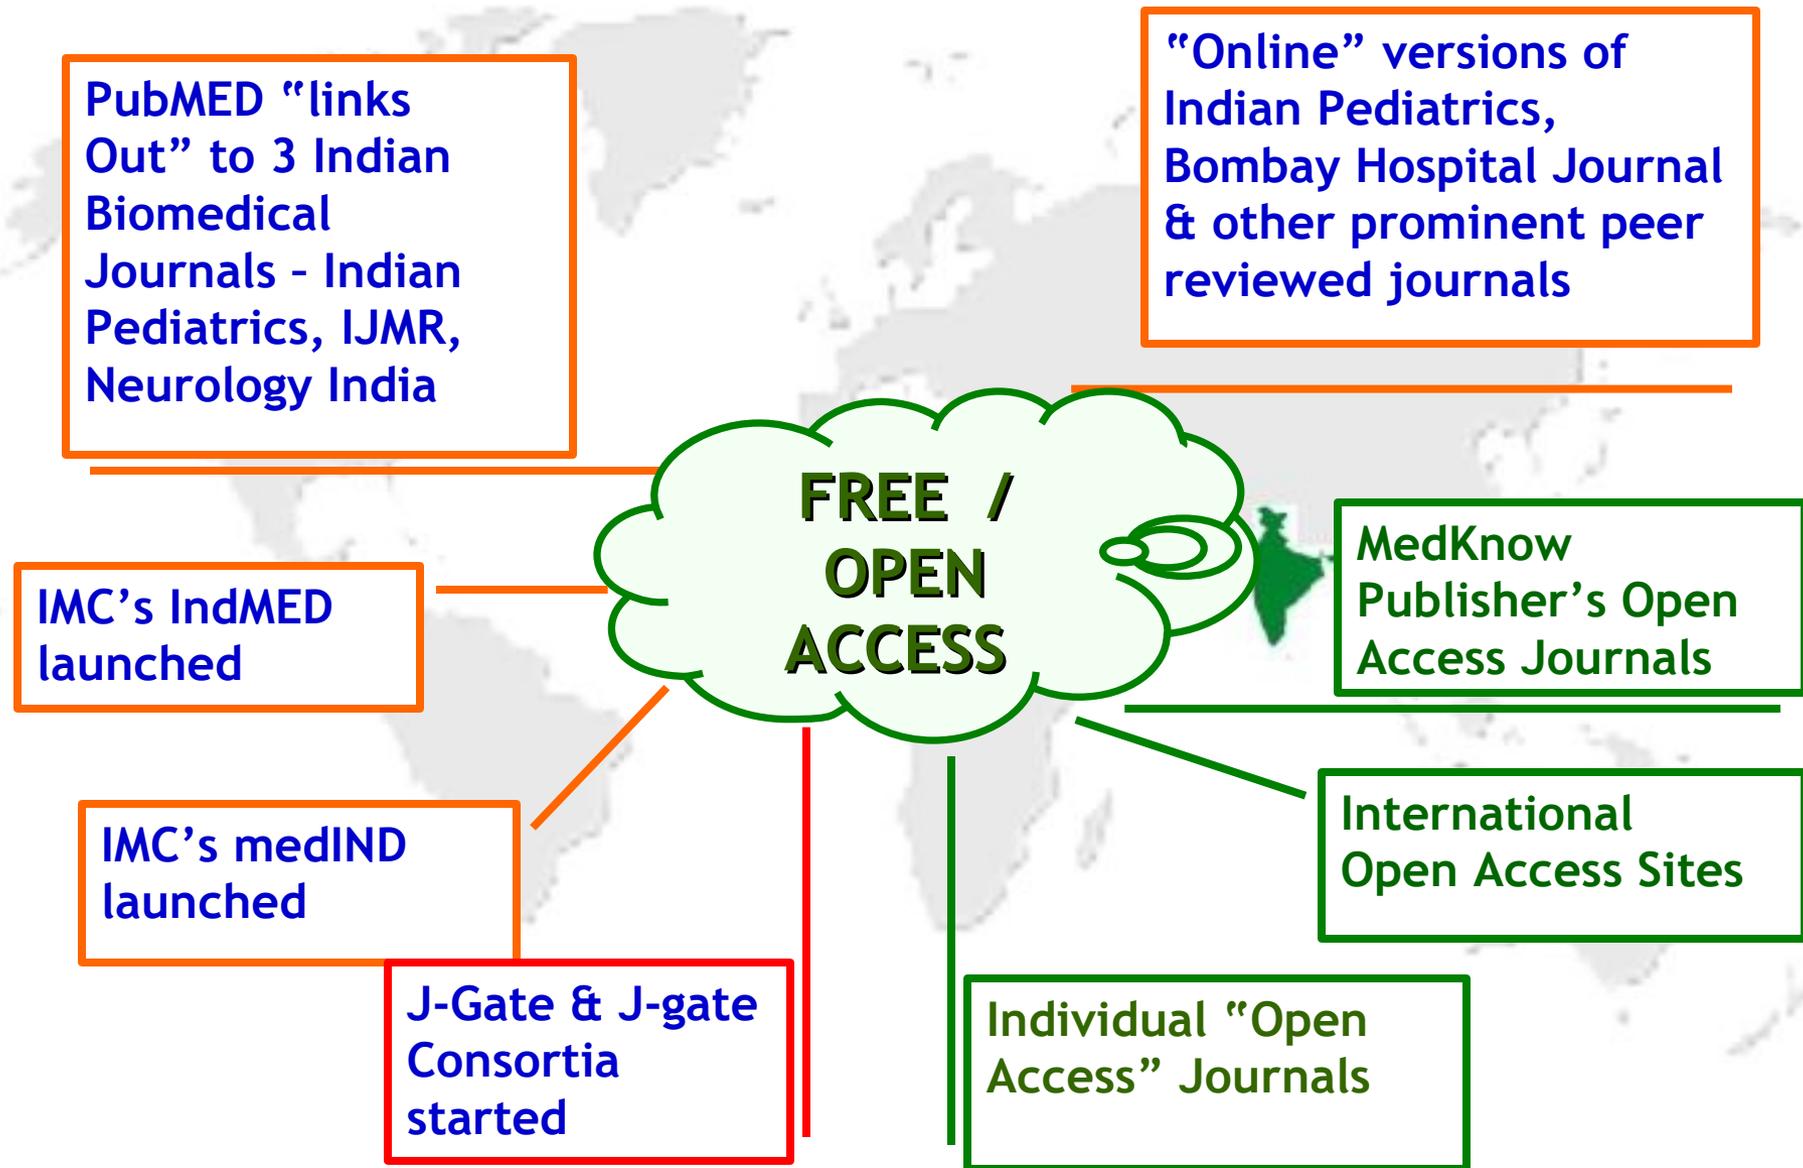

- Focus on Journals in Medical, Biomedical & Allied Sciences...
- From “free access” to “open access”...
- Current status of journals in India (free or open)...
- Briefly about “open / institutional archives” existing in India...

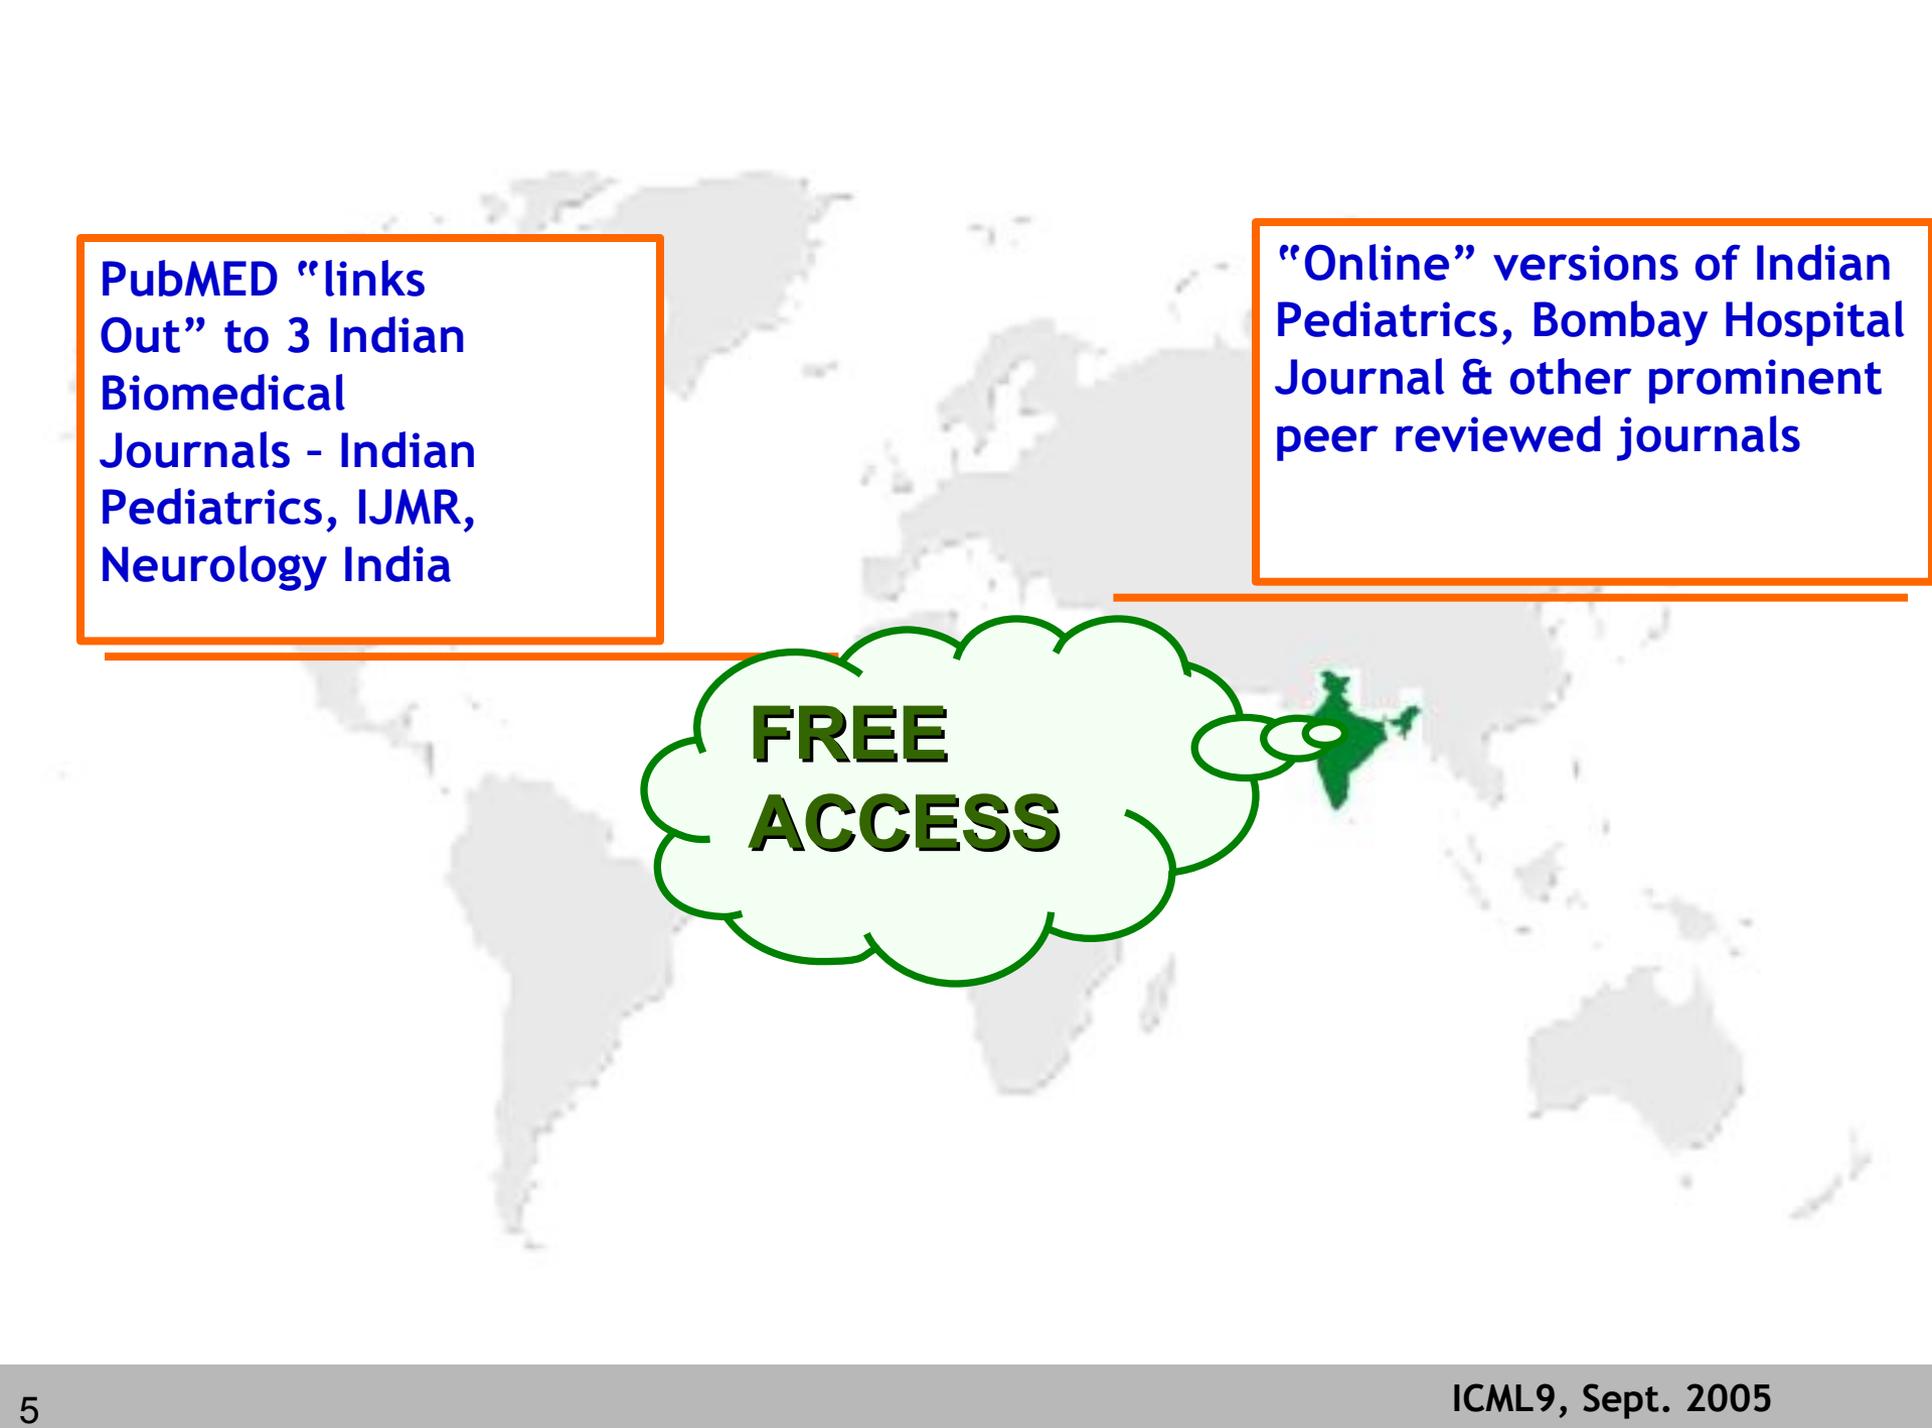

From “Free Access” to “Open Access”...

Free Access initiatives - Indian Pediatrics & other prominent journals on Net; IMC's IndMED & medIND Databases, J-Gate & JCCC

Budapest & Bethesda Open Access Movements

Open Access Initiatives - MedKnow Publ. & other Individual Journals...

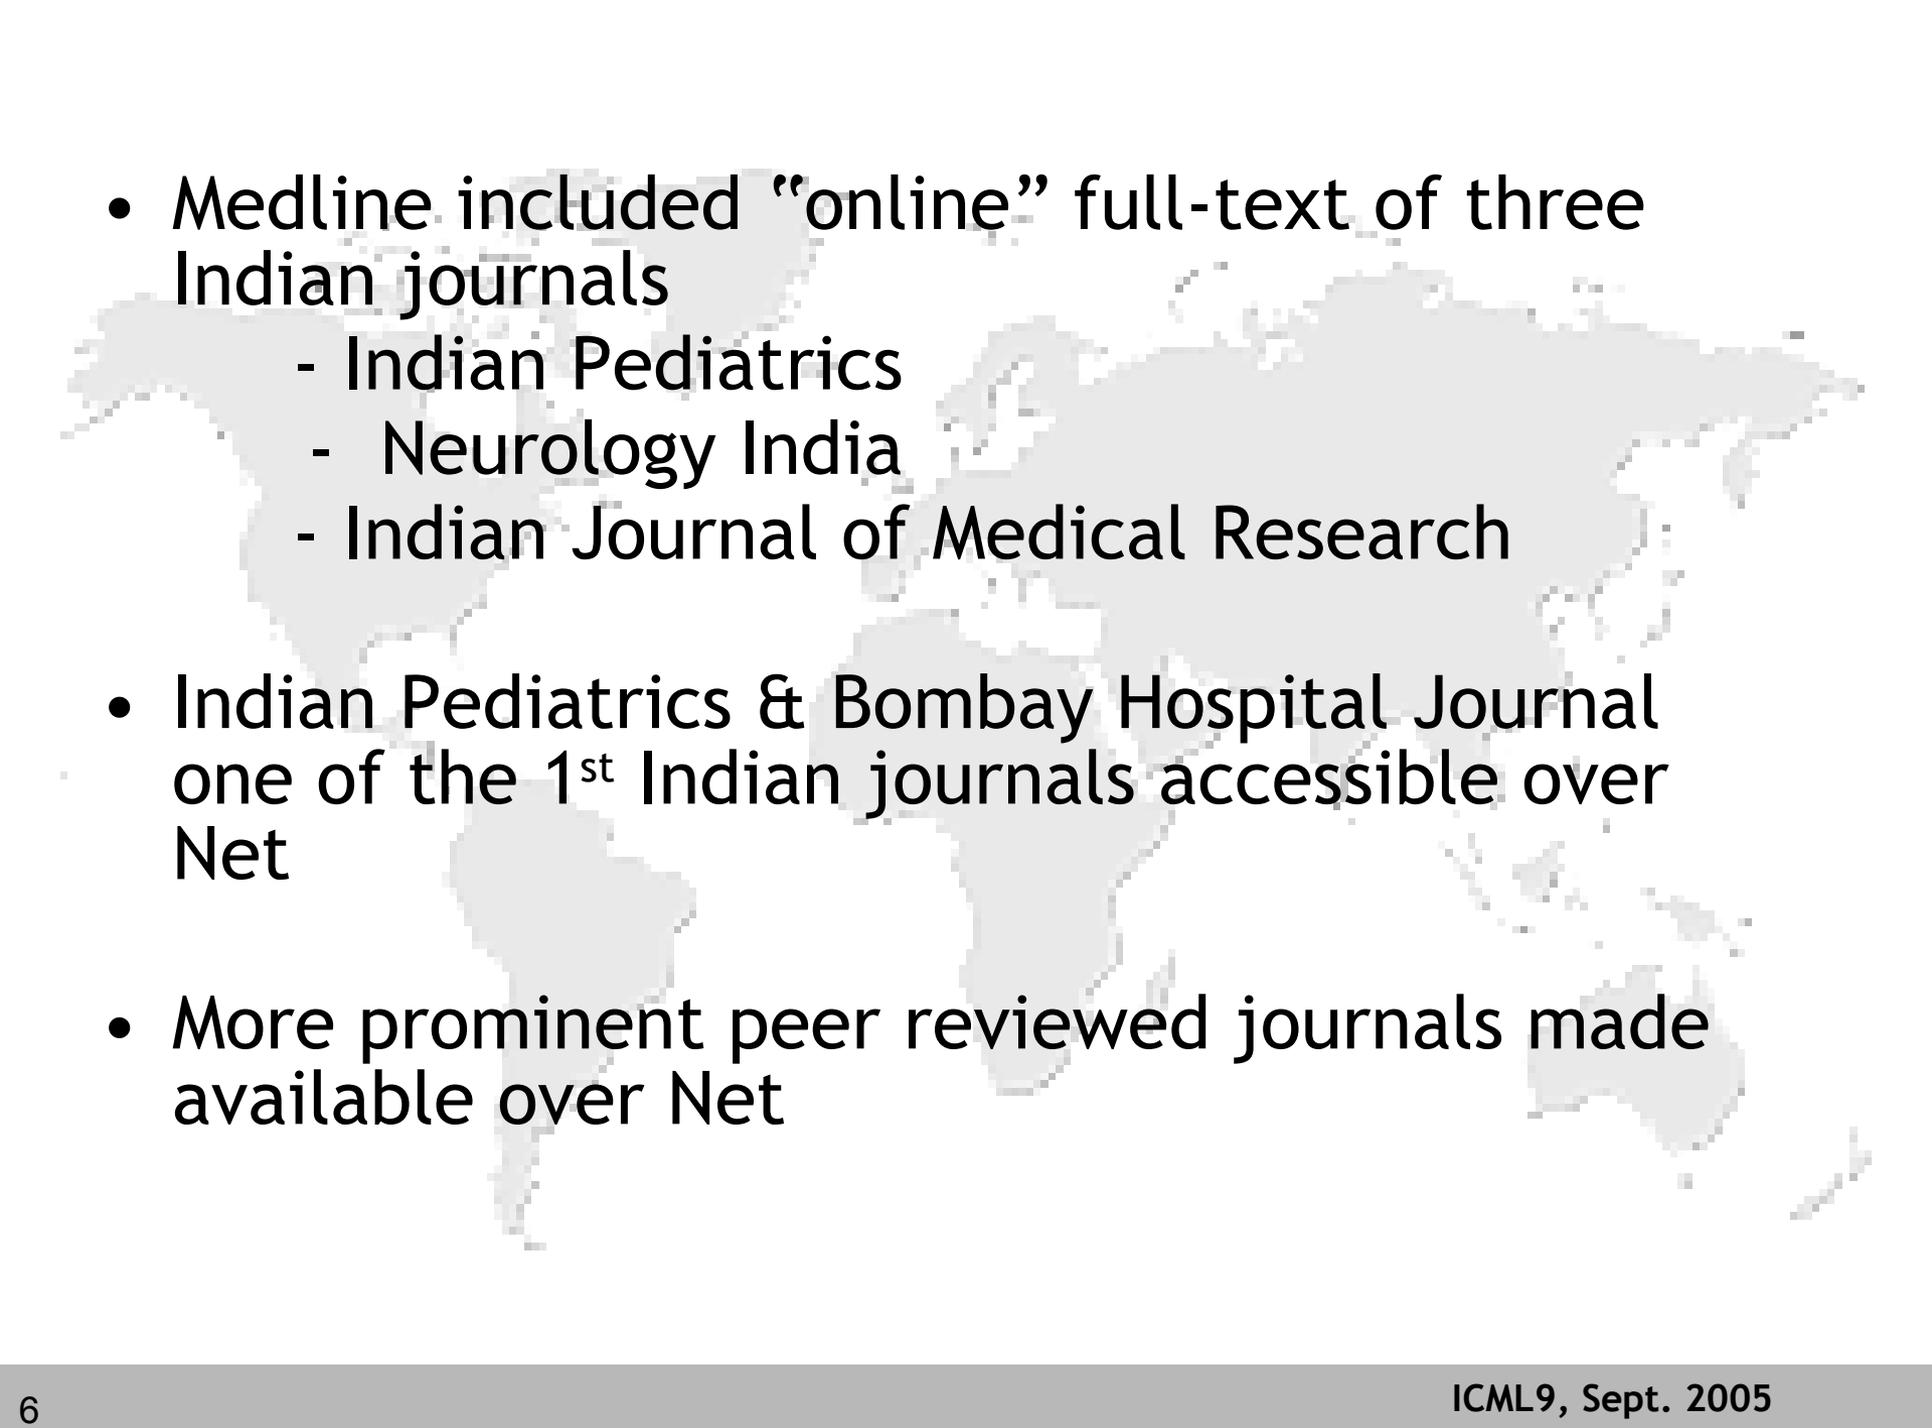

PubMed “links
Out” to 3 Indian
Biomedical
Journals - Indian
Pediatrics, IJMR,
Neurology India

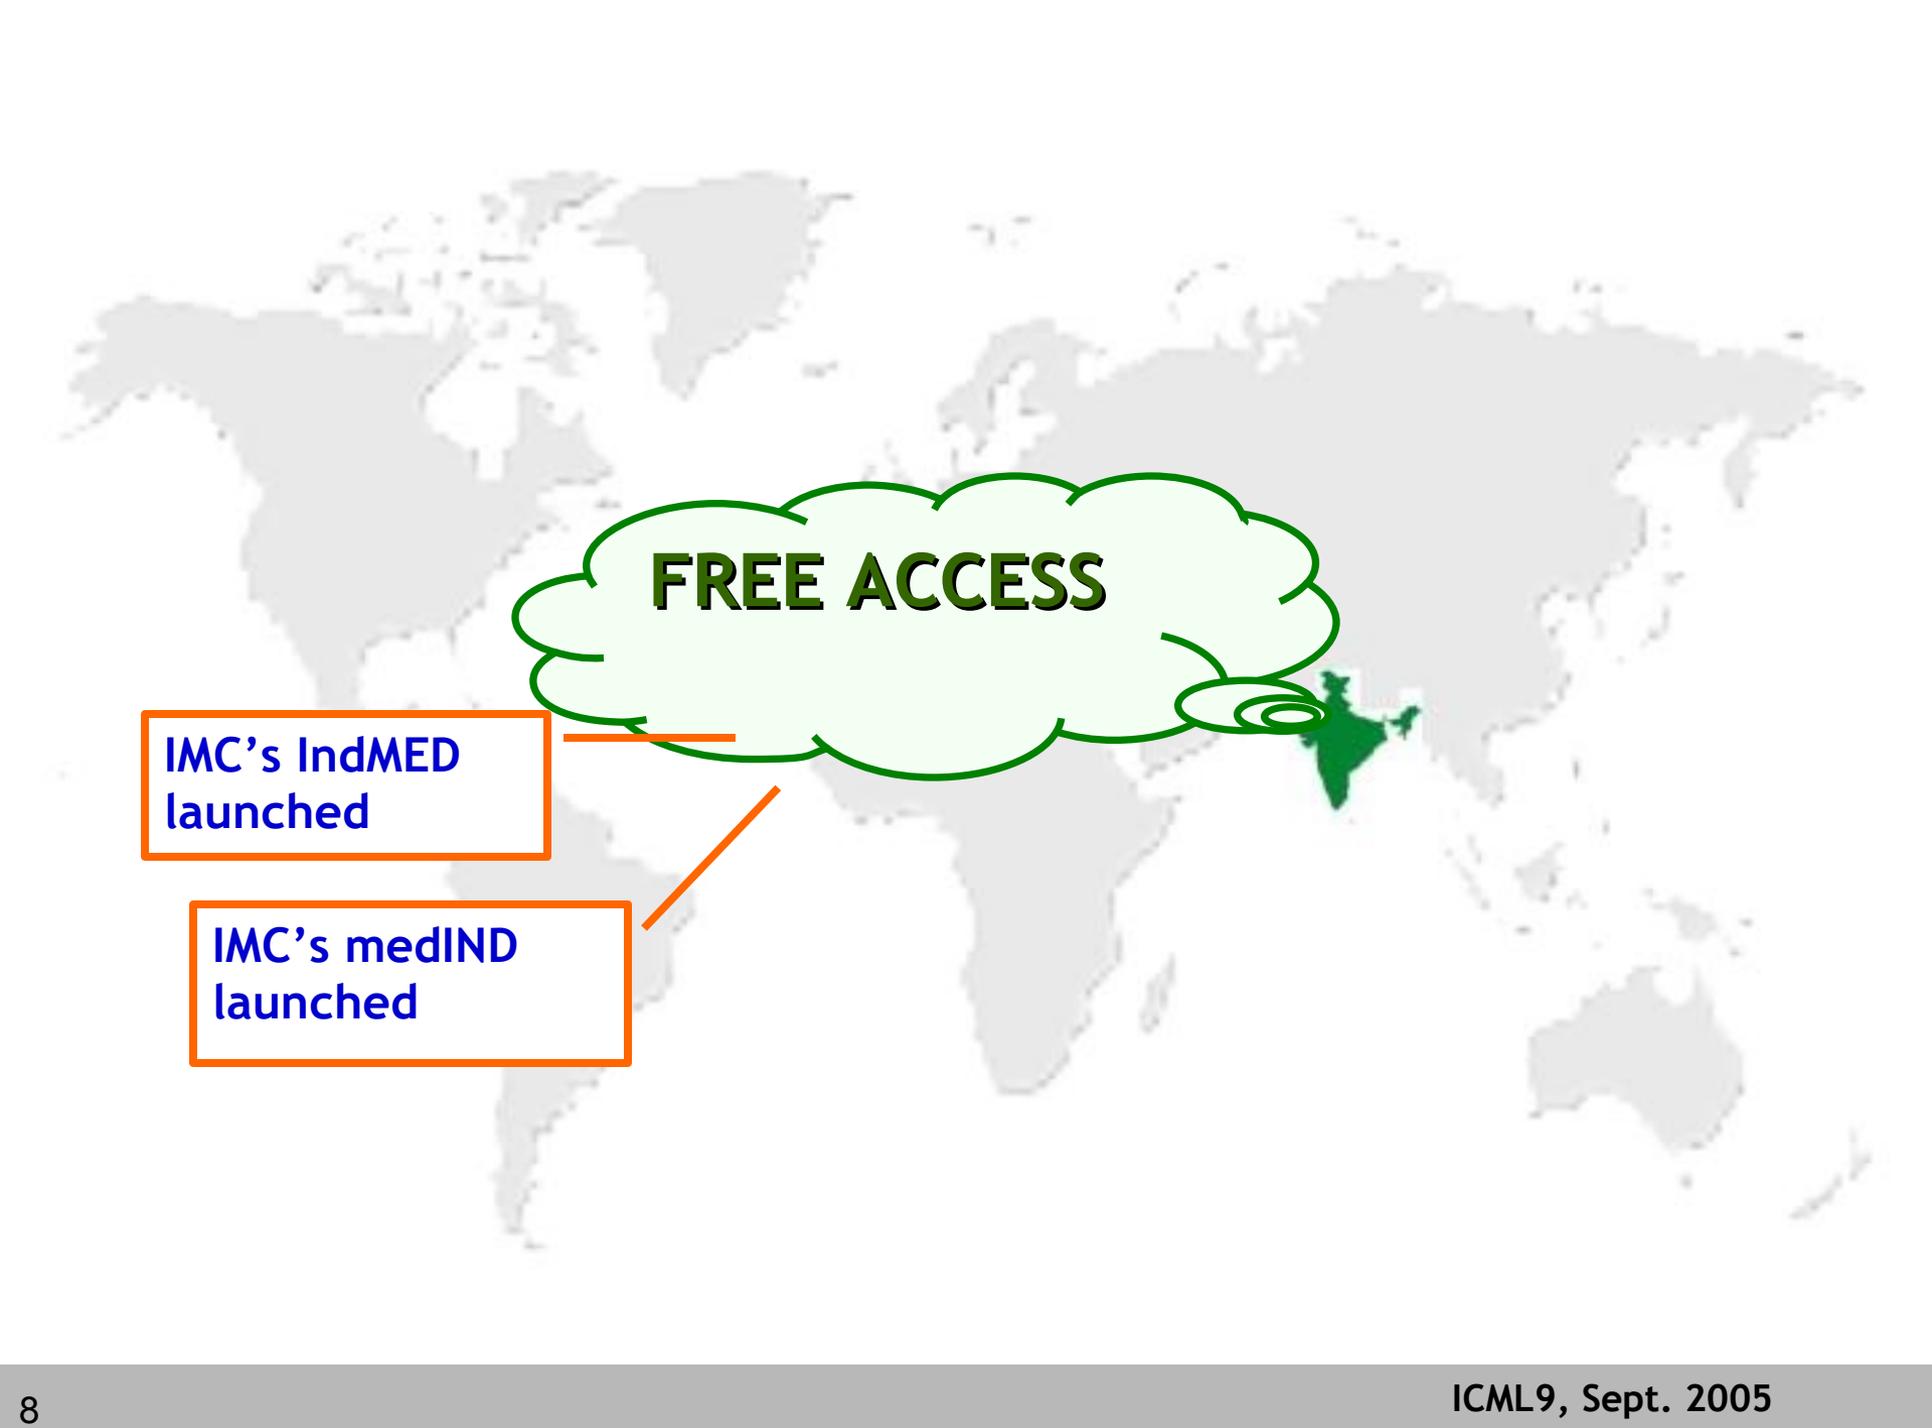

“Online” versions of Indian
Pediatrics, Bombay Hospital
Journal & other prominent
peer reviewed journals

**FREE
ACCESS**

- 
- Medline included “online” full-text of three Indian journals
 - Indian Pediatrics
 - Neurology India
 - Indian Journal of Medical Research
 - Indian Pediatrics & Bombay Hospital Journal one of the 1st Indian journals accessible over Net
 - More prominent peer reviewed journals made available over Net

Journals on the Net

- Annals of Cardiac Anesthesia
- Bombay Hospital Journal
- Indian Pediatrics
- Indian Journal of Medical Research
- Indian Journal of Radiology & Imaging (*)
- Indian Heart Journal
- Indian Journal of Nephrology (*)
- Indian Journal of Gastroenterology
- Indian Journal of Clinical Practice
- Journal of Anatomical Society of India
- Journal of the Association of Physicians of India
- Journal of the Indian Medical Association
- Trends in Biomaterials & Artificial Organs

A world map with a light gray background. A green cloud-shaped callout is centered over the Indian subcontinent, containing the text "FREE ACCESS". Two orange-bordered rectangular callouts are positioned to the left of the cloud. The top one is connected to the cloud by a horizontal orange line and contains the text "IMC's IndMED launched". The bottom one is connected to the cloud by a diagonal orange line and contains the text "IMC's medIND launched". The country of India is highlighted in a darker green color on the map.

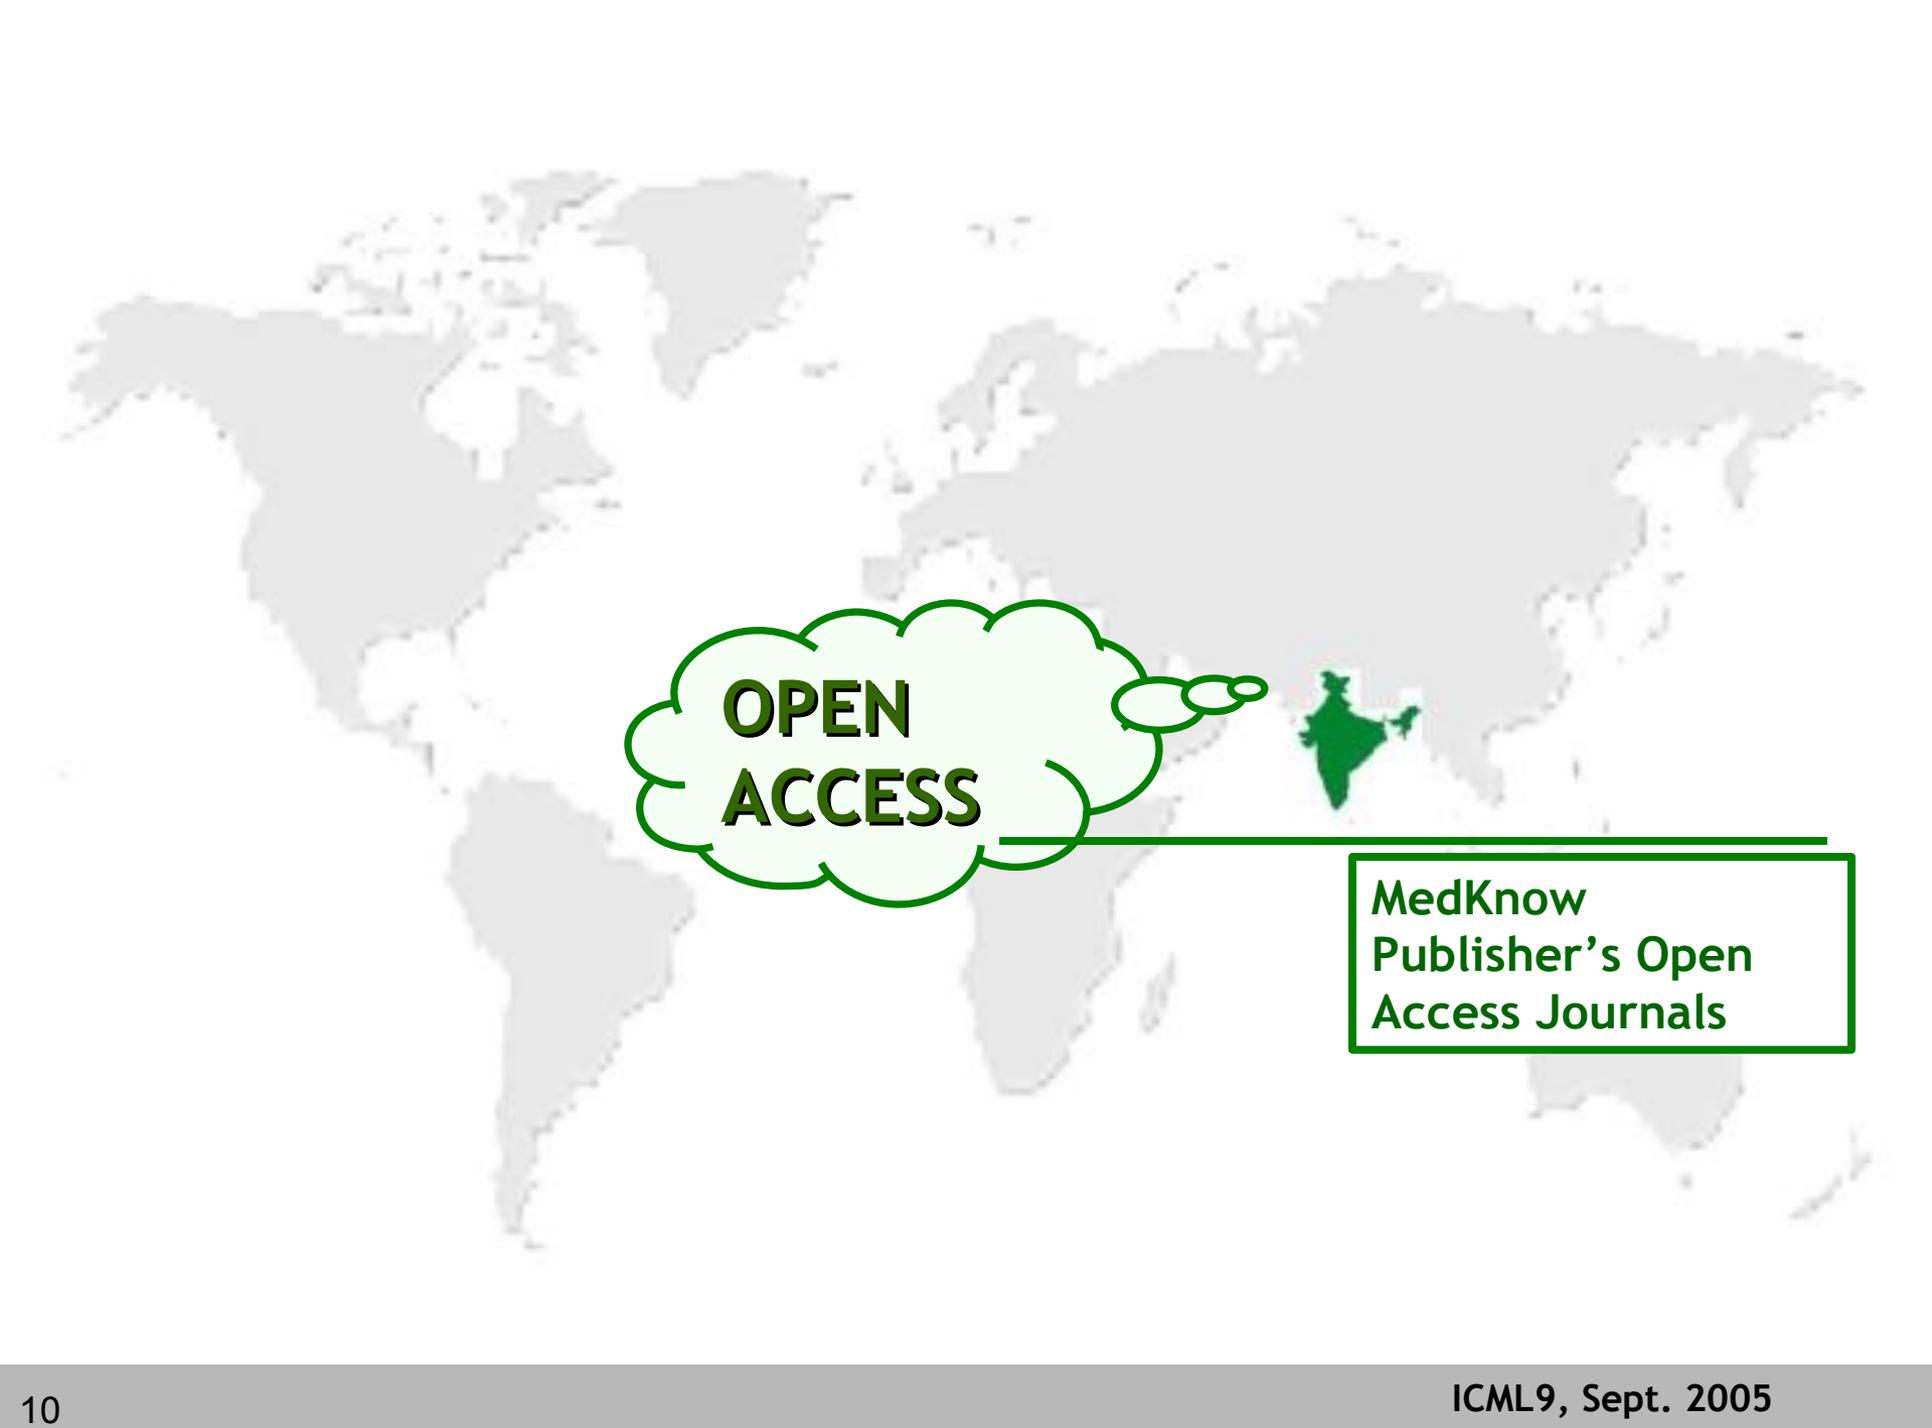

FREE ACCESS

IMC's IndMED
launched

IMC's medIND
launched

Indian Medlars Centre (IMC) - Free Access Initiative

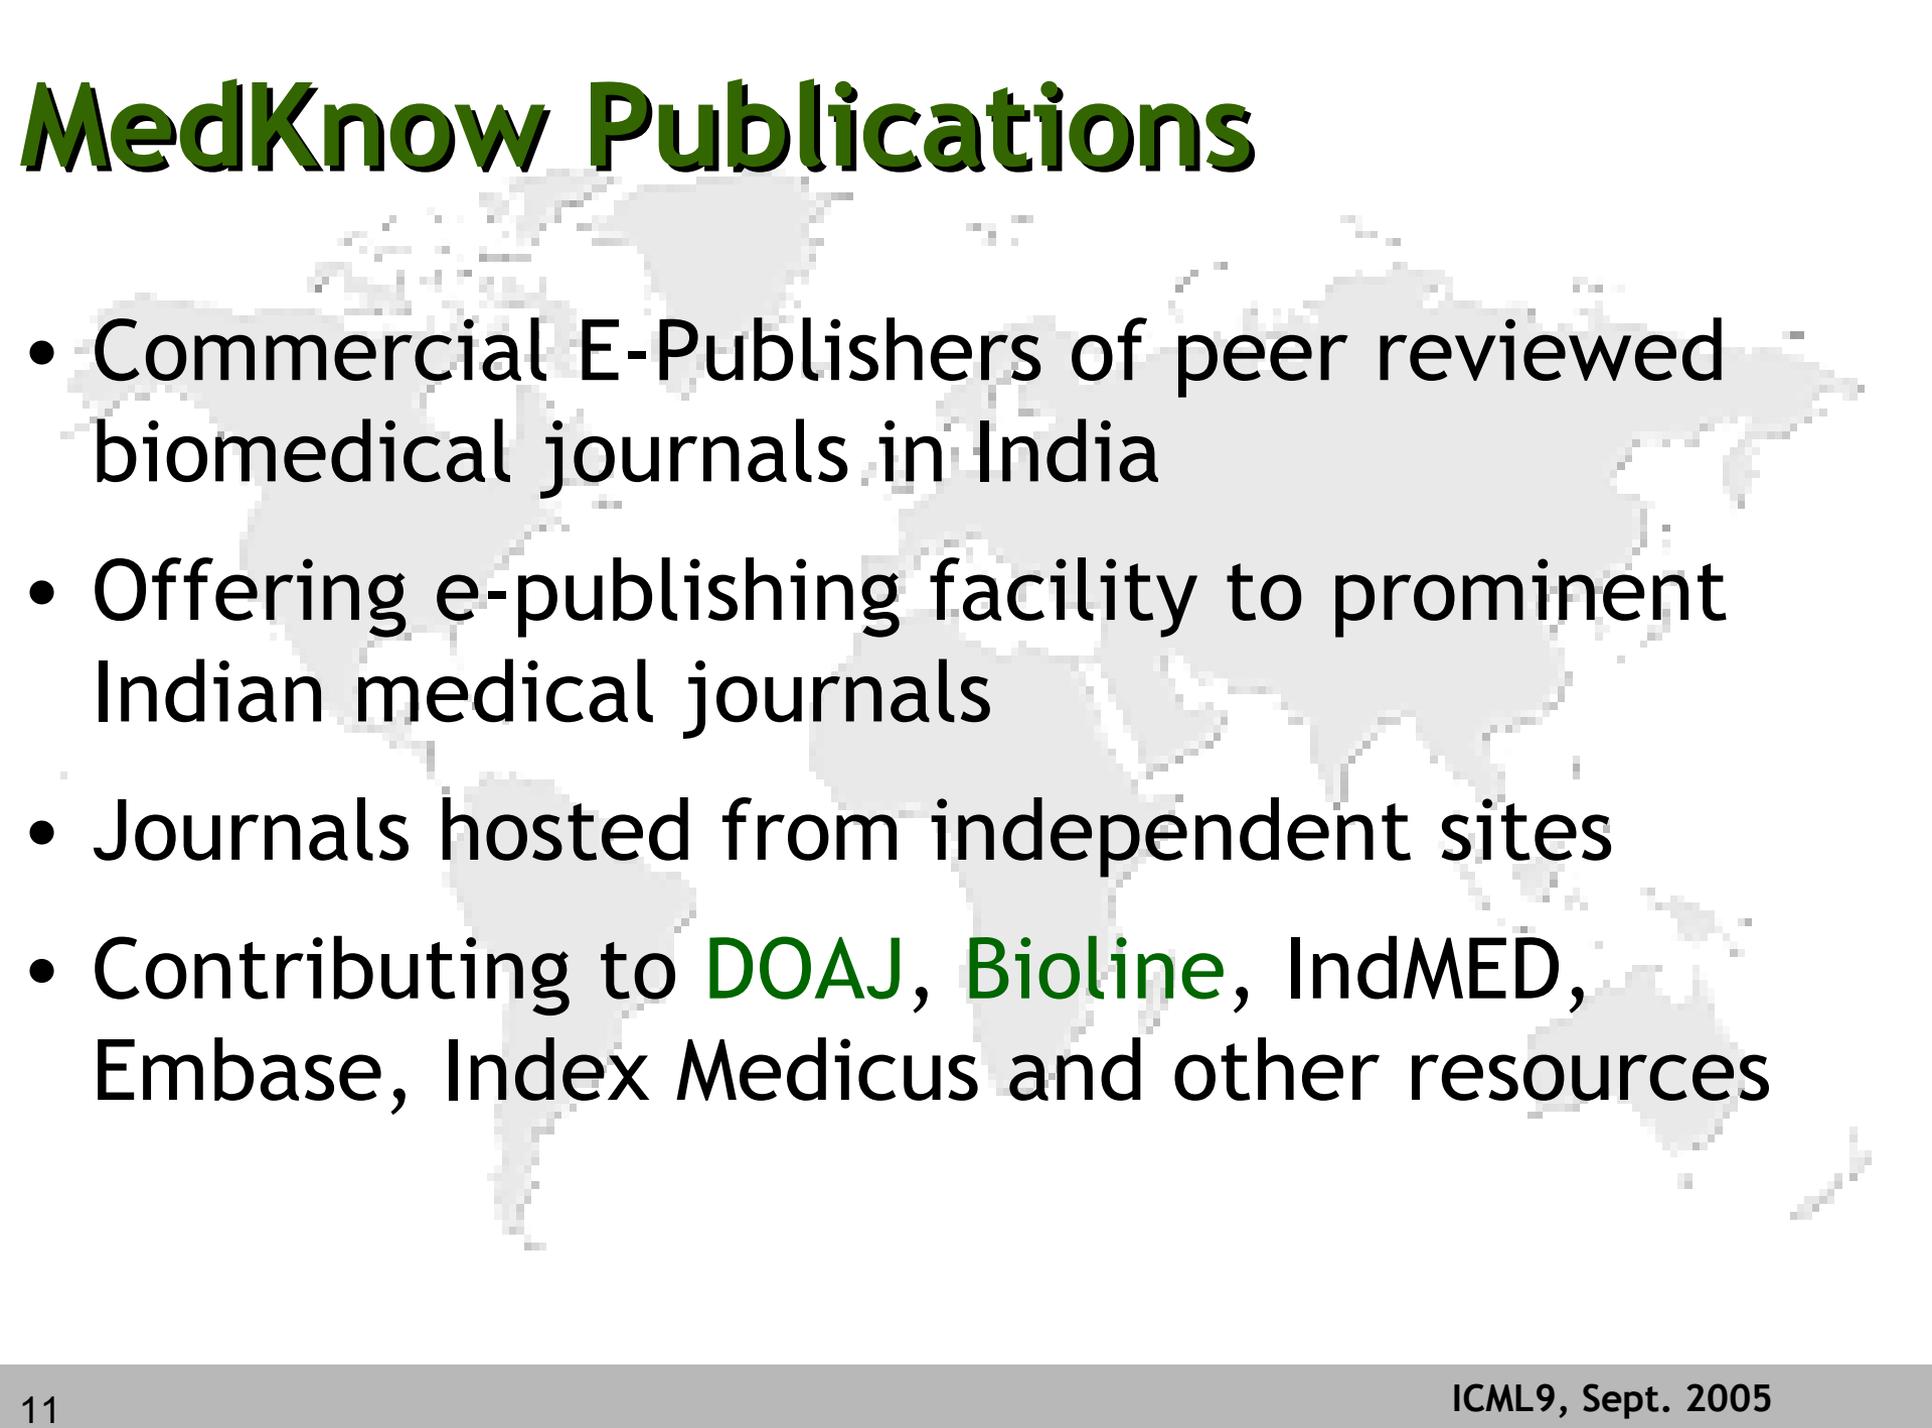

- Designed & developed **IndMED** database in 1998 - Bibliographic database of peer reviewed Indian “non-Medline” Indian biomedical journals; coverage from 1985 onwards.
- Full-text version of **IndMED** launched in 2003 - **medIND** currently has 35 full-text journals. Also covers full-text of Medline journals (Indian). Prospective coverage from 2003 onwards and retrospective from 2000.

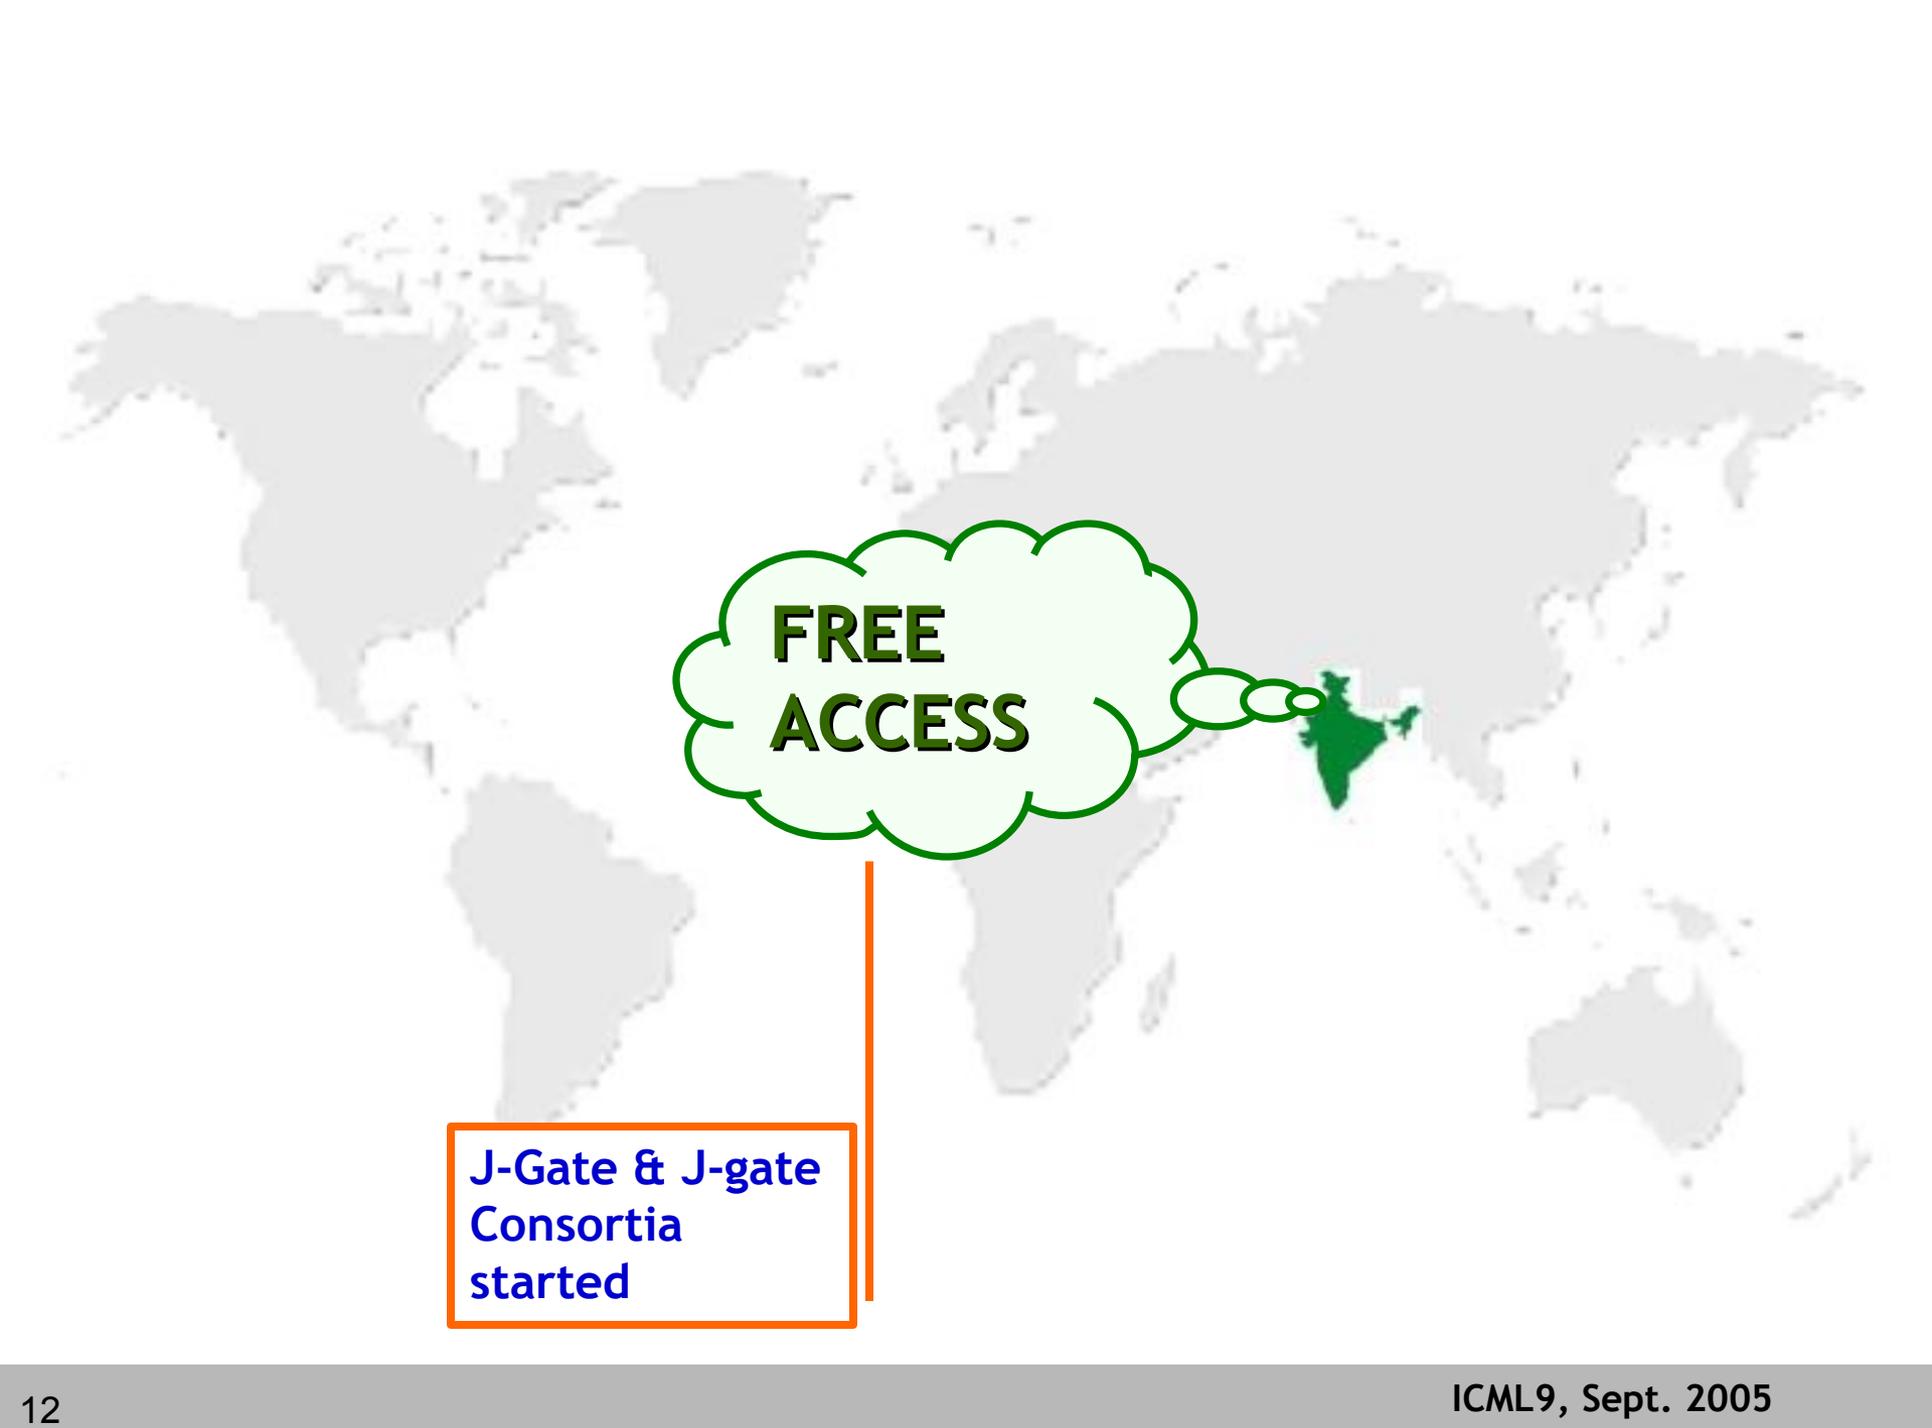

**OPEN
ACCESS**

**MedKnow
Publisher's Open
Access Journals**

MedKnow Publications

- Commercial E-Publishers of peer reviewed biomedical journals in India
- Offering e-publishing facility to prominent Indian medical journals
- Journals hosted from independent sites
- Contributing to **DOAJ**, **Bioline**, IndMED, Embase, Index Medicus and other resources

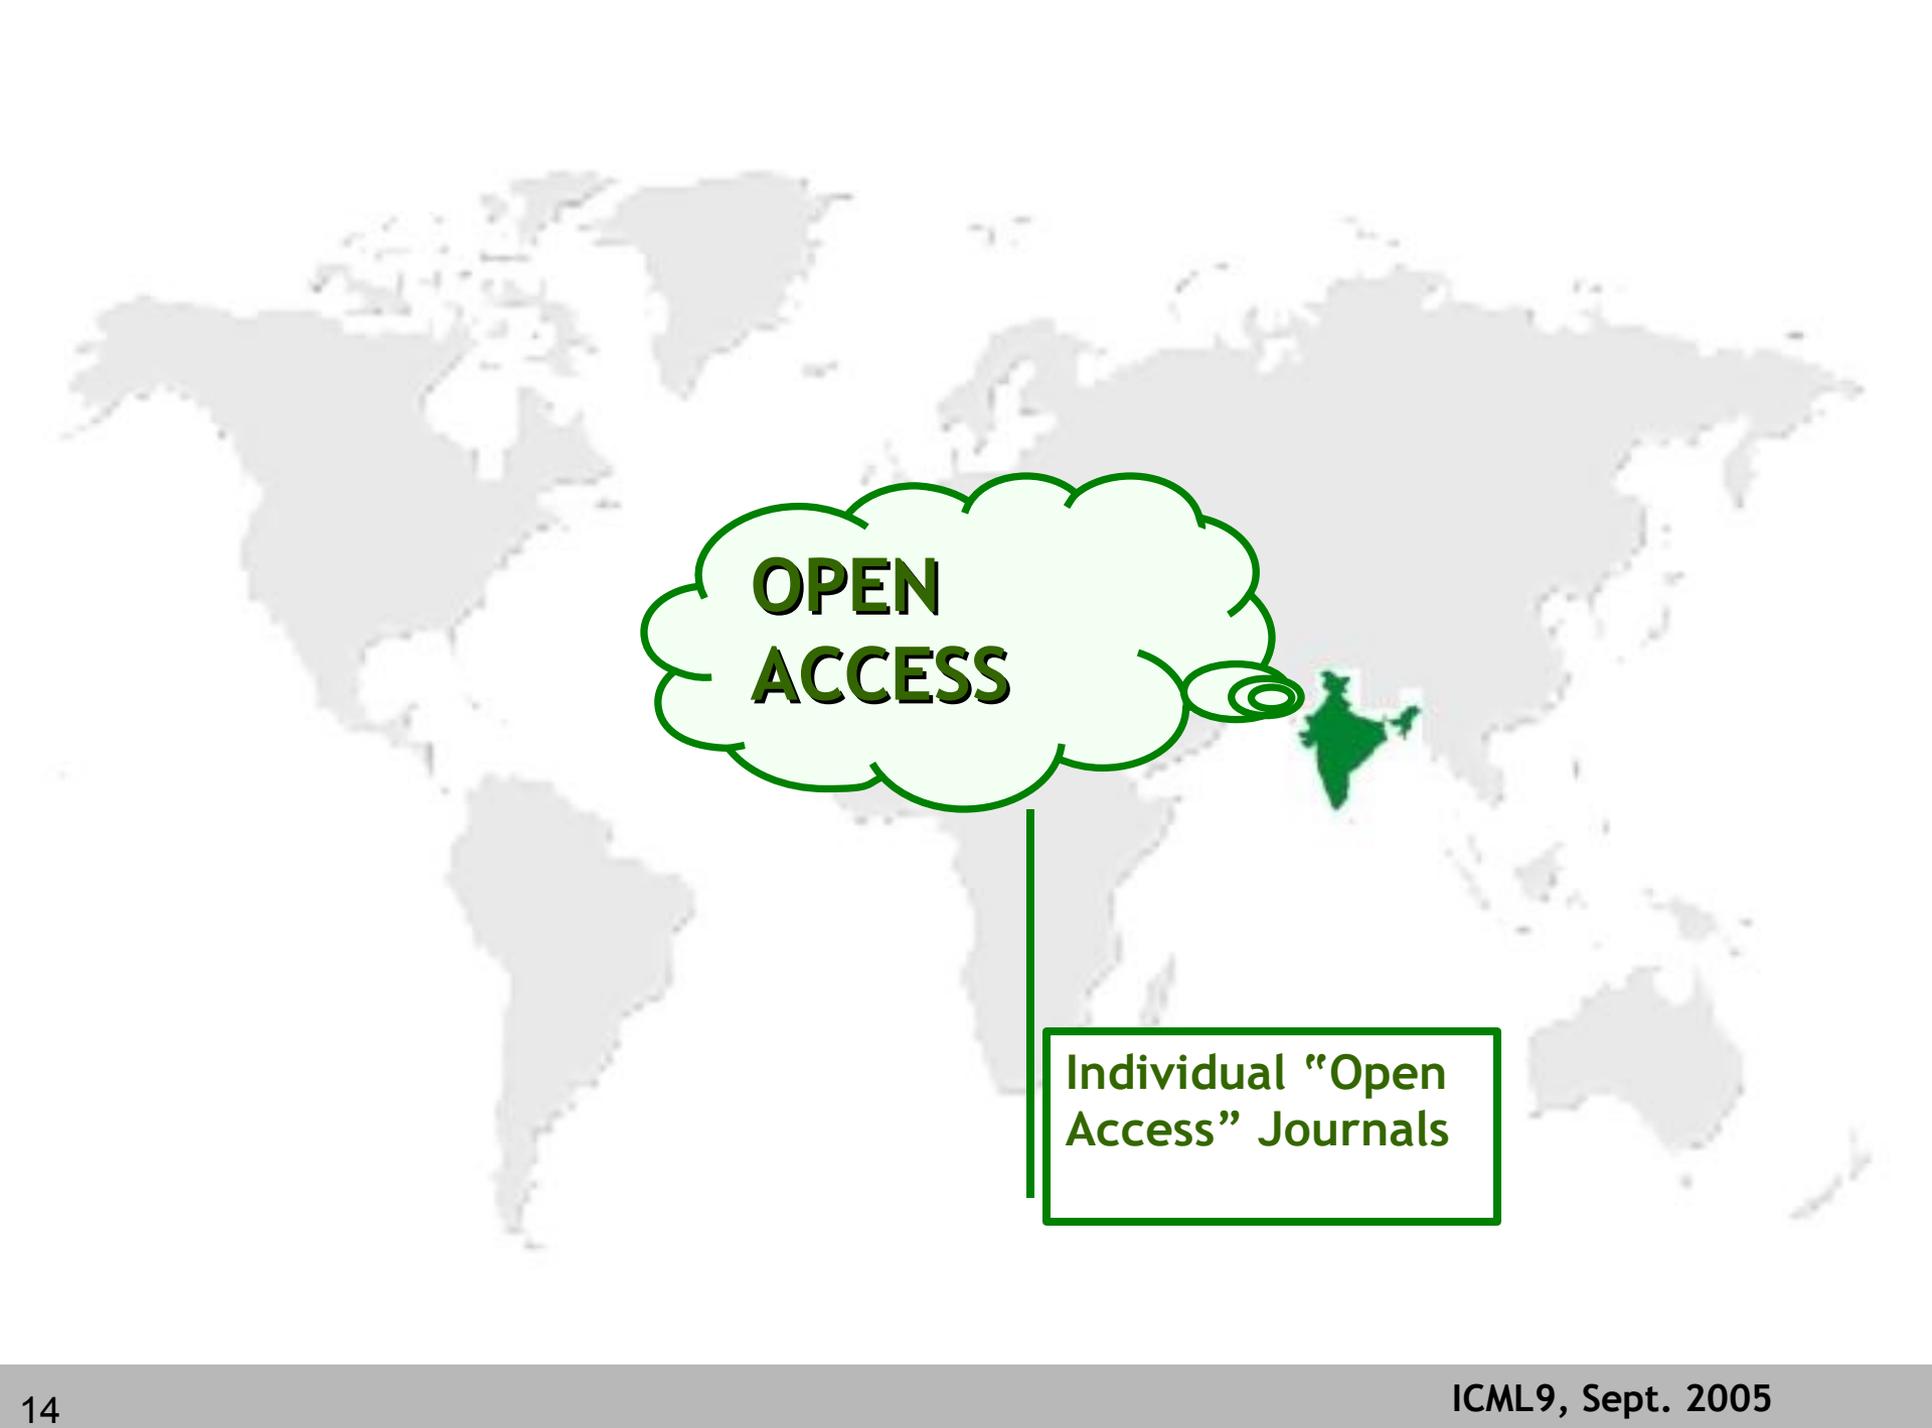

A world map with a light gray background. The country of India is highlighted in a solid green color. A green callout bubble with a scalloped border is positioned over India, containing the text "FREE ACCESS" in bold, green, uppercase letters. A thin orange vertical line extends from the bottom of the bubble down to a rectangular box.

**FREE
ACCESS**

**J-Gate & J-gate
Consortia
started**

J-Gate (Informatics India)

- Commercial e-gateway to global e-journal literature providing seamless access to millions of journal articles available online by linking to full text at publisher sites
- JCCC-ICMR for Indian Council of Medical Research (ICMR) covering 478 journals received collectively at 24 institutions/centres of ICMR; approx. 215 open access journals also covered
- JCCC-NTI, a customized product for National Tuberculosis Institute (NTI), Bangalore
- JCCC@HELINET, for Health Sciences Library & Information Network (HELINET), Bangalore

A world map with a light gray background. The country of India is highlighted in a solid green color. A green-outlined thought bubble is positioned over the Indian subcontinent, containing the text "OPEN ACCESS". A vertical line extends from the bottom of the bubble to a green-outlined rectangular box containing the text "Individual 'Open Access' Journals".

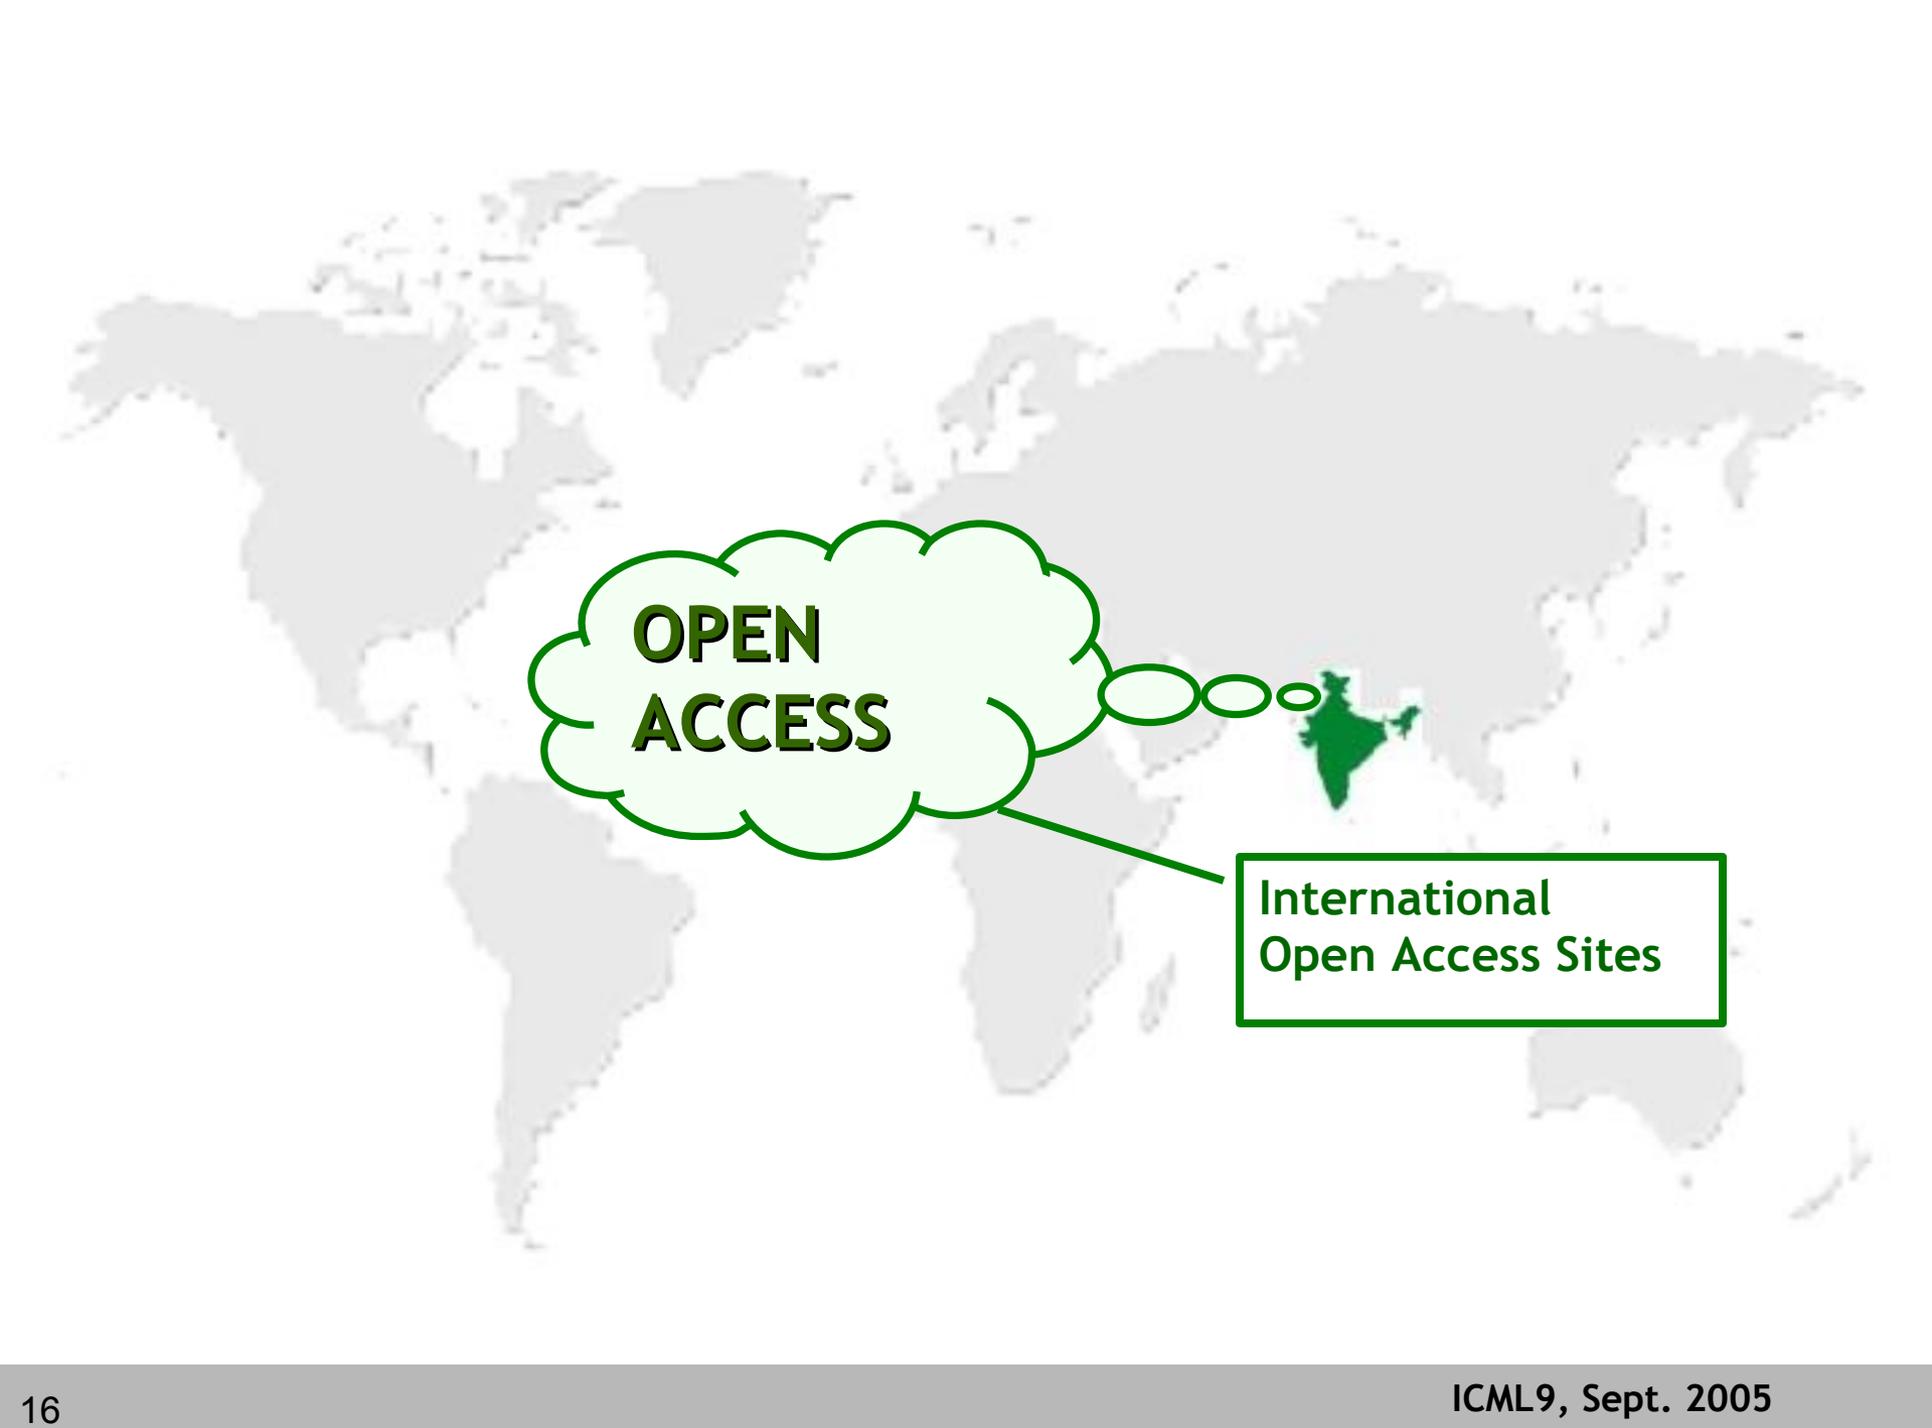

**OPEN
ACCESS**

Individual "Open
Access" Journals

Individual Open Access journals

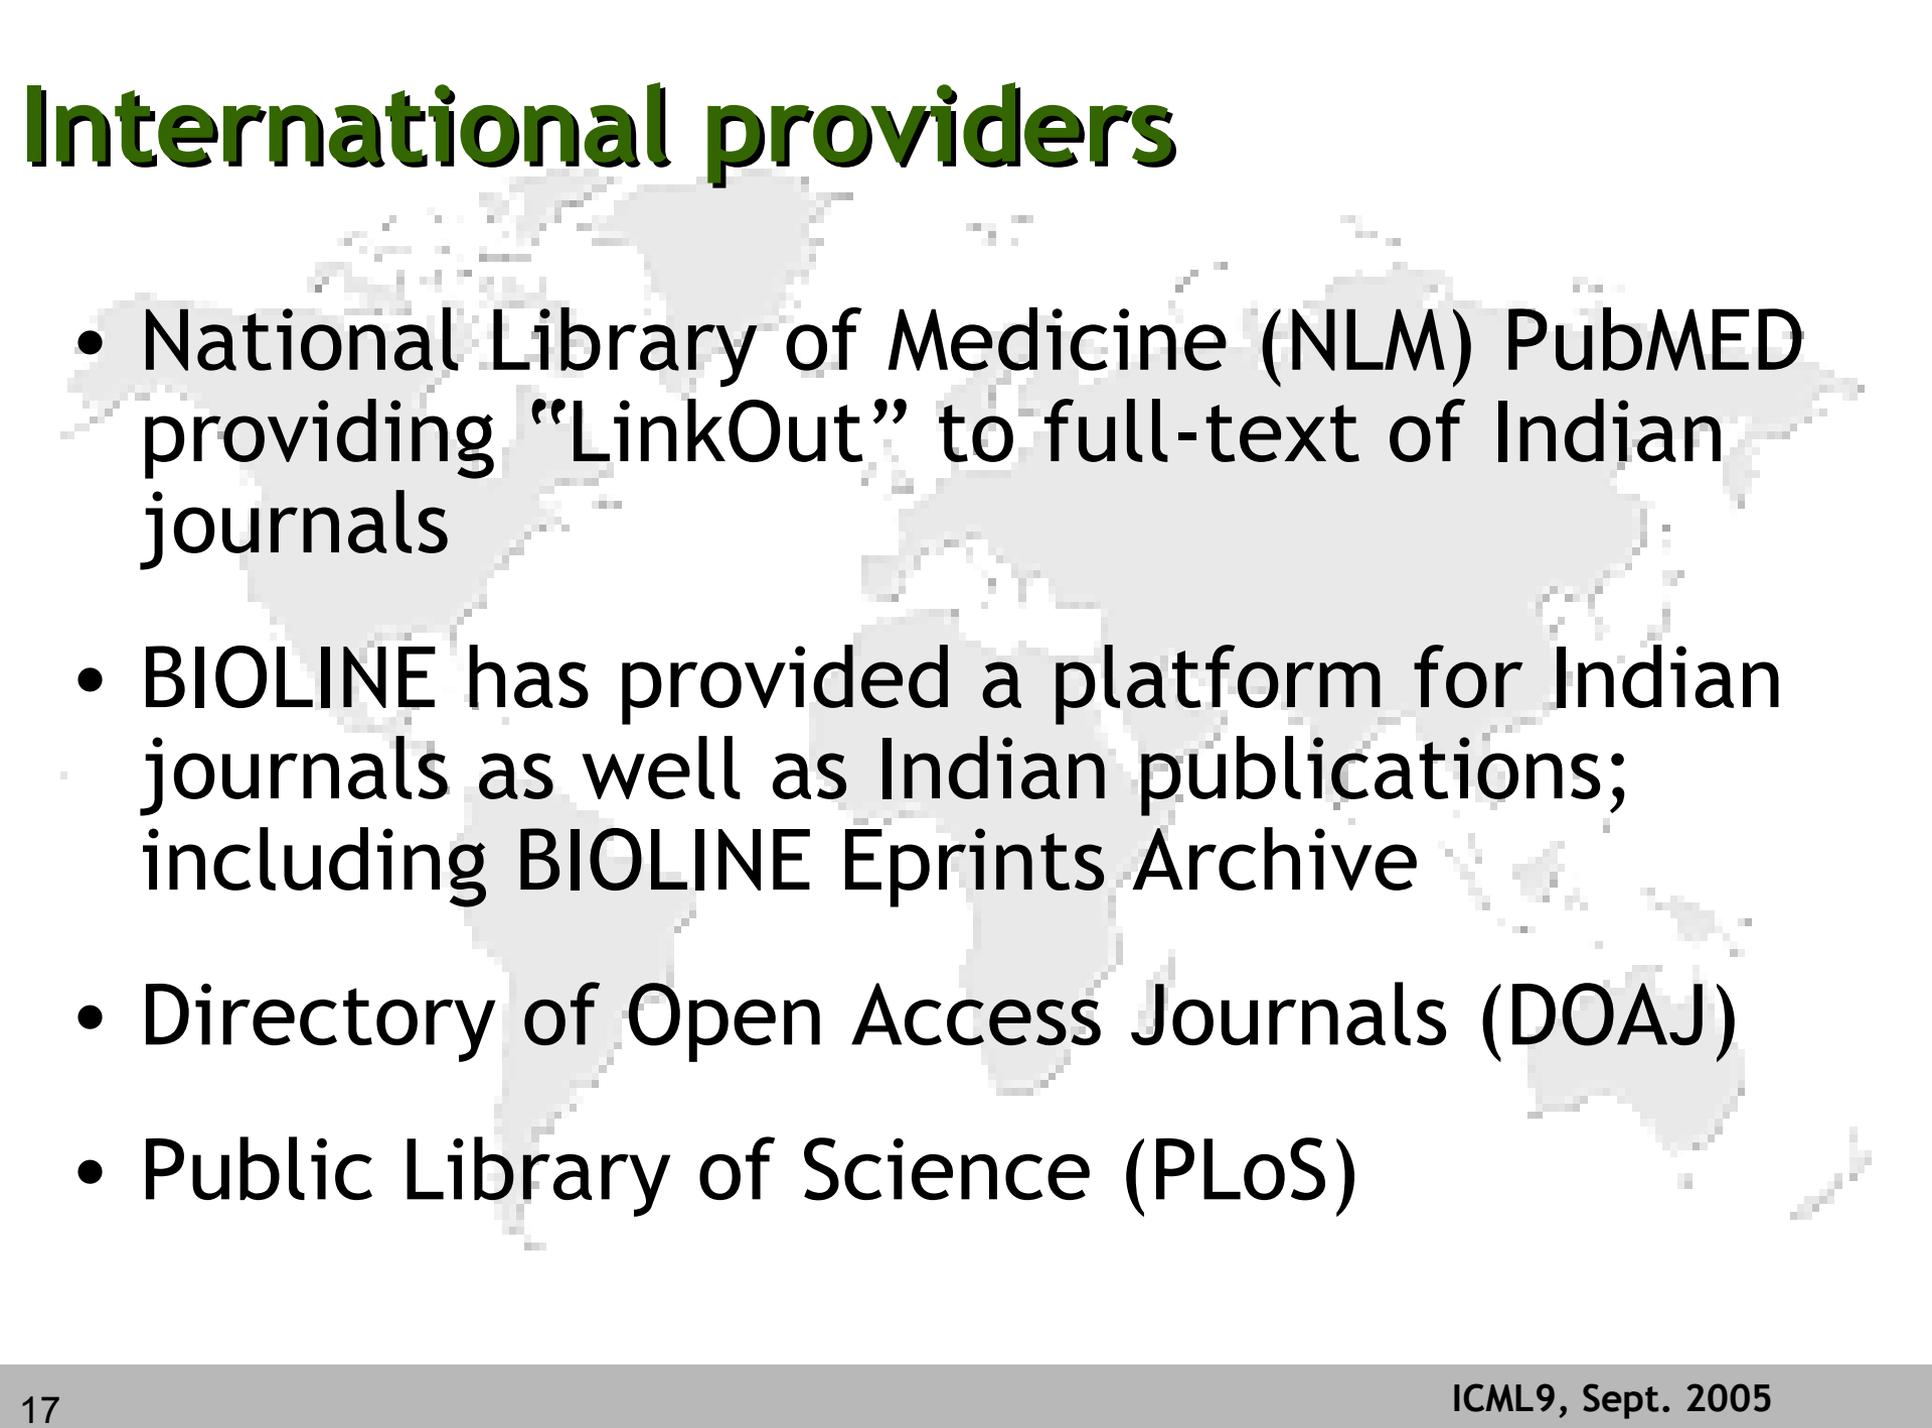

- Indian Pacing and Electrophysiology Journal
- Calicut Medical Journal
- Journal of Indian Association for Child and Adolescent Mental Health
- Online Journal of Health and Allied Sciences
- Indian Journal of Medical Ethics
- Journal of Orthopaedics

A world map with a light gray background. The country of India is highlighted in a solid green color. A green-outlined thought bubble is positioned over the Indian subcontinent, containing the text "OPEN ACCESS". A line extends from the bottom of the bubble to a rectangular box on the right side of the map.

**OPEN
ACCESS**

**International
Open Access Sites**

International providers

- National Library of Medicine (NLM) PubMed providing “LinkOut” to full-text of Indian journals
- BIOLINE has provided a platform for Indian journals as well as Indian publications; including BIOLINE Eprints Archive
- Directory of Open Access Journals (DOAJ)
- Public Library of Science (PLoS)

IndMED

IndMED - database covering prominent peer reviewed Indian biomedical journals. Database designed to provide medical professionals/researchers/students and the medical library professional quick and easy access to Indian literature.

Scope: Indian contribution in the areas of biomedical research and health care has been significant and conforming to international standards. However, only a small fraction of it is available for reference through international bibliographic databases. The ICMR-NIC Centre for Biomedical Information ([Indian MEDLARS Centre](#) or IMC) has designed and developed a bibliographic database of peer reviewed Indian biomedical literature. This database covers [prominent Indian journals](#). These have been [selected](#) from more than 200 journals. More journals would be added to the list as their quality improves in coming years. It is proposed to cover the journals from 1985 onwards in this database.

Search: Use Simple or Advanced modes of search or just use the search box. [HELP](#) is also available providing step by step guide on how to search the database.

TERMS OF USE: For research purpose use only. Repackaging and copying this information in any form is strictly prohibited. The content of IndMED database is compiled from research articles published in the Indian biomedical journals. IMC is not responsible for the information appearing / provided in these journals. You are requested to directly contact authors/publishers for any clarifications or comments/feedback.

Welcome to Medknow Publications

We provide solutions for the scientific publishing community, helping in publication and dissemination of the research and thus converting research to knowledge.

Latest Journal

The Indian Journal of Ophthalmology (ISSN 0301-4738) or IJO which is in its 53rd year today, is the official scientific journal of the All India Ophthalmological Society (AIOS),

which at a membership strength of over 9000 is probably the 2nd largest society of ophthalmologists in the world. The IJO which is an indexed, peer reviewed journal, originated as a platform for the scientific expression of the AIOS which is the umbrella society to which almost all ophthalmologists in India belong. However it has grown over

About JCCC-ICMR

JCCC is J-Gate Custom Content (JCC) for a group of homogeneous consortia members. JCCC-ICMR is an extension of JCC, for the Indian Council of Medical Research (ICMR). It covers 478 journals received collectively at 24 institutions/centres of ICMR. In addition to these, around 215 open access journals are also covered. In all, journals from 417 publishers are covered on a single platform.

Mission of JCCC-ICMR

- ◆ To provide a common gateway to e-journals for the participating members of the consortium
- ◆ To provide a common access and search interface for all journals subscribed by the consortium members
- ◆ To provide a insured and dependable journal archive source for the consortium members

Significance of JCCC-ICMR

- ◆ Common access to Table of Content (TOC) and full-text articles for 693 Journals
- ◆ Common TOC and Database search facility for both print and online journals, which have scholarly content and are subscribed by the consortium members
- ◆ Links to abstracts of articles
- ◆ Links to full-text articles from JCCC interface
- ◆ Facility to search bibliographic database of articles
- ◆ Content is mirrored in the server of each participating consortia member
- ◆ Links to the journals subscribed by each participating consortia member
- ◆ E-mail request for photocopies can be sent from one consortia member to the other

JCCC-NTI

About JCCC-NTI

JCCC is J-Gate Custom Content (JCCC) for a group of homogeneous consortia members. JCCC-NTI, an extension of JCCC, is a customized product for the National Tuberculosis Institute (NTI), Bangalore. The members of the JCCC-NTI consortia include:

1. National Tuberculosis Institute, Bangalore
2. Tuberculosis Research Centre, Chennai
3. VP Chest Institute, New Delhi
4. Lala Ram Swarup Hospital for TB and Chest Medicine, New Delhi

Mission of JCCC-NTI

- To provide a common gateway to e-journals for the participating members of the consortium.
- To provide a common access and search interface for all journals subscribed by the consortium members.
- To provide an insured and dependable journal archive source for the consortium members.

Features of JCCC-NTI

- Common access to Table of Content (TOC) and full-text articles.
- Common TOC and Database search facility for both print and online journals, which have scholarly content and are subscribed by the consortium members.
- Links to abstracts of articles.
- Links to full-text articles from JCCC interface.
- Facility to search Bibliographic Database of articles.
- Content is mirrored in the server of each participating consortia member.
- Links to the journals subscribed by each participating consortia member.
- E-mail request for photocopies can be sent from one consortia member to the other.

Abstract

The reaction of heterocyclic dicarboxylic acids, such as pyridine-2,5-dicarboxylic acid and imidazole-4,5-dicarboxylic acid, under hydrothermal conditions in the presence of an appropriate zinc salt yields three new zinc coordination polymers

3 have zig-zag one-dimensional chain structures. The Zn^{2+} ions are coordinated by both the carboxylate oxygen atoms and also by the nitrogen atoms of the heterocycles. The 1,10-phenanthroline molecules in 2 and 3 act as a secondary ligands and occupy the inter-chain spaces. The moderate hydrogen-bond interaction energy in 1 and the $\pi \dots \pi$ interactions in 2 and 3 appear to play an important role for the structural stability. The structures of 2 and 3 appear to be related, even though they are formed with different carboxylic acids. All three compounds exhibit photoluminescence at room temperature.

SDL: Search Digital Libraries

DRTC has launched a OAI-Compliant Harvester. SDL harvests presently 13 digital repositories in Library and Information Science. Soon, a few open access journals in LIS will be added. One can access full-text of about 5500 articles in LIS.

You can access SDL at <http://drtc.isibang.ac.in/sdl>

OpenMED@NIC

An international Archive for Medical & Allied Sciences

- Provide a platform for self - archiving for Indian professionals (free of charge)
- Archive exclusively for Medical / Biomedical and Allied Sciences
- Designed Self Help Tutorials
- Medical Subject Headings for indexing so more relevant search for medical/biomedical terms
- Over 500 publications from 1952 onwards; over 200 related to TB; 1st issue of IJT
- Backed by reliable NIC (GOI) infrastructure

Welcome to OpenMED@NIC

OpenMED is an **open access** archive for Medical and Allied Sciences. Here authors / owners can self-archive their scientific and technical documents. For this they need to **register** once in order to obtain a user id in OpenMED system. However no registration is required for searching the archive or viewing the documents.

OpenMED is a discipline based International Archive. It accepts both published and unpublished documents having relevance to research in Medical and Allied Sciences including Bio-Medical, Medical Informatics, Dental, Nursing and Pharmaceutical Sciences. These could be preprints (pre-refereed journal paper), postprints (refereed journal paper), conference papers, conference posters, presentations, technical reports/departmental working papers and theses. In case of non-English documents, descriptive data [Author, Title, Source etc.], abstract and keywords must be in English. Submitted documents will be placed into the submission buffer and would become part of OpenMED archive on their acceptance.

The aim of OpenMED is to provide free service to academics, researchers, and students working in the area of Medical and Allied Sciences. We expect it to promote self-archiving and open access to papers / scholarly publications in these fields. Authors who wish to post papers to the Archive should first consult the **Submission** Policy. Inclusion in OpenMED Archive gives no assurance of any kind regarding the correctness or quality of the information / software. Users must read **Disclaimer** before using this site.

Brugada-type electrocardiographic pattern induced by fever

Ozeke, Ozcan; Aras, Dursun; Geyik, Bilal; Deveci, Bulent and Selcuk, Timur (2005) *Brugada-type electrocardiographic pattern induced by fever*. Indian Pacing and Electrophysiology Journal, 5 (2). pp. 146-148. ISSN 0972-6292

Abstract

ST-segment elevation in Brugada syndrome is caused by a shift in the ionic current balance and the creation of a voltage gradient between the epicardium and the endocardium. This ionic mechanism have been shown to be temperature dependent. We describe a 33-year-old man who presented with fever with the dynamic electrocardiographic changes similar to the Brugada syndrome. These electrocardiographic anomalies disappeared when the temperature returned to normal.
